## SKILLS

- Frontend-Development
- Backend-Development
- Fullstack-Development

### Languages :

Python	JavaScript
Java	HTML

### Frameworks :

Django	Hibernate
SpringBoot	Bootstrap
Spring	

### Database :

- MYSQL, SQL, MongoDB

### Author Technical Skills :

- Git , Postman , Heroku , ect...

### Soft Skills :

Leadership	Problem Solving
Team Work	Communication
Time management	

## EDUCATION

### Bachelor of Science - Computer Science Regional College of Science and Humanities

2019 - 2023

### Higher Secondary - Computer Science Govt. Higher Secondary School Vazhakkad

2017-2019

## PERSONAL DOSSIER

Date of birth : 26/12/2001

Gender: Male

Nationality : India

## ABOUT ME

I am an enthusiastic BSc in Computer Science background Student, who is highly passionate about learning new technologies and finding innovative ways to implement them. I have 8 months of experience working as a full-stack developer intern. I possess a strong work ethic and the ability to perform well under pressure, whether working in a team or individually. I am currently seeking fresh challenges and opportunities to succeed.

## EXPERIENCE

### Jr. Java Full Stack Intern

November 2023 - March 2024

- Java Full Stack developer
- During my internship as a Java developer, I gained practical expertise with various techniques in Java along with SpringBoot, Hibernate, JavaScript and DBMS. I actively participated in the designing and development of web applications, strengthening my Java skills, and learning numerous elements such as database integration, URL routing, and web security.

### Python Full Stack

May 2023 - November 2023

- Python Full Stack developer
- During my Python internship, I gained a comprehensive understanding of Python programming for web development. I used Django to build robust web applications, mastered URL routing, SQL-based database management, and implemented security measures. I also polished my front-end skills, including HTML, CSS, Bootstrap And JavaScript. This valuable internship solidified my proficiency in Python development.

## KEY PROJECTS

### GuppiesStore - Python - Django

- As a freelancer, I Developed GuppiesStore, a Django-based e-commerce platform for selling fancy fish. Designed a scalable backend, responsive UI, and PostgreSQL database. Integrated payment gateways, order tracking, and user authentication. Built admin features for inventory, orders, and shipping updates. Automated product quantity updates upon purchase and performed extensive testing. The platform is ready for deployment.
- Key technologies are Python Django, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, PythonAnywhere etc...

### BookStore - Java - Spring Boot

- Developed a comprehensive BookStore web application using Java and the Spring Boot framework, enabling users to add, view, edit, and delete books, as well as manage a personalized favorite list of books
- Implemented full CRUD (Create, Read, Update, Delete) operations and user-specific features, ensuring a seamless and user-friendly experience for managing book collections and favourite lists.

### Portfolio

- Check out my portfolio to see my other works, it's showcasing my knowledge in full-stack web development and other filed: <https://github.com/iammujthaba>
